# ROUND SQUARE ACTIVITY

One day Sustainability Suki and Diversity Dani went for a walk around a lake when then they saw a flower shop and they decided to buy some plants. Then they went home and got some rest. She heard a ring on her phone. It was her friend Diversity Dani. She picked up her phone and heard the sound of people cutting down trees. Suki asked Dani to come over to her house. They both went together and asked the people why they were cutting the trees. They said they were cutting down trees to make paper. Suki and Dani told them that they shouldn't cut all the trees because they provide oxygen and food, they also help prevent landslides. They understood their mistake and said sorry. Moral: "Let's protect our trees."
